Job Title: Programmer Analyst

Job Type: Full Time

Job Location: CA-Fremont

Posted On: 2016-06-01

Job Description:

Vertisystem, Inc. is seeking a qualified professional to fill the position of Programmer Analyst based in Fremont, California. Responsibilities include: create, modify, and test the code, forms, and script that allow computer applications to run. Adhere to specifications and requirements drawn up by software developers or other individuals. Analyze user needs and design software solutions. Write, analyze, review, and rewrite programs and applications, and correct errors by making appropriate changes and rechecking the program to ensure that the desired results are produced. Update, repair and modify code and routines of existing software programs. Identify impacts to the existing systems, map changes, and align them to current requirements. Create and execute user testing plans and scripts. Generate specifications, workflow charts and data flow diagrams to show organizational processes and structure. Create, maintain procedures, packages, functions, index, triggers and other database objects. Provide end-user support. Utilize experience in PL/SQL, Oracle Exadata, Unix Scripting, TIBCO Spotfire and Oracle 12C. Position requires 50% national travel.

Job Responsibilities:

--

Required Skills:

This position requires a Bachelor's degree or foreign equivalent degree in Computer Science, Computer Applications, Computer Engineering or a related field plus five (5) years of experience in a related occupation. Position also requires experience with PL/SQL, Oracle Exadata, Unix Scripting, TIBCO Spotfire and Oracle 12C.
